7.	Comment
	. Comment on deferment of Moroccan debate in UN General Assembly:
	strong verbal protests against the UN General Committee's postponement of debate on Arab charges that France is violating human rights in Morocco. The Communist press also will exploit US support for French "repressive" measures as another example of US "imperialism" in Africa. Demonstrations and disorders are probable, but sufficient French troops are in the area to control the situation.
	This postponement is a major political and diplomatic victory for France as well as for Western solidarity. French-US relations throughout North Africa, but most particularly in Morocco, can now be expected to improve. The US, however, will lose favor with the Moroccan Sultan and the nationalists, although neither will turn to the USSR for assistance.
	The Arab states have indicated their intention to bring up the matter again when the Committee presents its proposed agenda for the approval of the General Assembly as a whole. Most Moroccan nationalist leaders, however, may be privately glad that the question is postponed because they have been apprehensive that the case was jeopardized by hasty preparation of the brief.

	he nevertheless will not accept any arrangement which ultimately will discriminate against Germany. McCloy believes that Adenauer would accept an arrangement whereby the Western Allies would give their assurances that at some "appropriate time" not too far distant they would see that Germany had the same relationship with NATO as other participants in the European Defense Community. As Adenauer would have to use such a promise in his dealings with German parliamentary leaders, it could not be kept secret.	
	Comment: It has been apparent for some weeks that the problem of Germany's relationship to NATO was worrying Adenauer Although the matter is not an urgent one at the moment, the Chancellor will certainly require satisfactory answers when the European army plan comes before the Bundestag, where the prevailing view is that Germany must receive equal treatment.	•
